

use with  
smartphone, iPad  
or Android tablets

**zapp2learn** is an interactive synthetic phonics system with a difference - an app is used to teach and interact with the specially designed **ZappBook**. It can be used on a smartphone or a tablet. Great for the classroom and superb for pupils working at home.

**Rated 5 stars by the Educational App Store.**

Pupils listen to the question on their device and then select the correct answer from a book or downloadable page using their camera. Instant feedback is provided to the pupil and a record of each pupils' progress can be monitored.

Easy to install and use. It covers the important phases 2 and 3 where new graphemes are introduced and phase 5 with alien words. Pupils really enjoy learning all the phonics they will need for the **phonic screening check**.

Schools can opt for a subscription license offering unlimited use of the **zapp2learn** app. This allows schools to set assignments for homework. Interactive worksheets are provided as a PDF download or the package can be purchased to include 24 books. The worksheets can either be printed by the school or placed on the school website for download.

**ZappBook**

|      |  |         |
|------|--|---------|
| 6620 | <b>Stickers (Phase 2 &amp; 3)</b>                        | £9.99   |
| 6621 | <b>Phase 2, 3 &amp; 5 with alien words</b>               |         |
|      | <b>ZappBooks and Activity books</b>                      | £39.99  |
| 6622 | <b>Six complete sets of ZappBooks and Activity books</b> | £210.00 |
| 6625 | <b>Self print unlimited downloads.</b>                   |         |
|      | <b>Includes PDFs and app licences.</b>                   |         |

Subscription is calculated from the size of the school at a rate of £1 + VAT per pupil annually
