

Maths Curriculum Puzzles

About the series

Maths Curriculum Puzzles is a series of 6 books of photocopiable worksheets designed for pupils at Key Stage 2 and older who need extra support to develop basic mathematical skills. The series is also available as a pdf cd at the same price plus VAT. Buy both versions and get the cd at half price.

The series can be used to provide:

additional practice in each mathematical skill: addition, subtraction, multiplication and division.

alternative /differentiated material for use in both whole class and small group settings.

homework activities to reinforce earlier class learning.

The series aims to develop mathematical skill through the medium of thought-provoking puzzles.

Each book provides 24 pages of puzzles together with a pupil record sheet on which the teacher can record comments about the pupil's achievement.

Books in the series

Book 1: Addition – numbers to 30

Book 2: Subtraction – numbers to 30
